# THE MPR TOROIDAL RF SYSTEM

## IS IT FOR ME?

The MPR Toroidal RF System suits all types and colors of the skin. It helps improve moderate slackening and may also be used to prevent aging signs.

## WHAT IS IT FOR?

The MPR Toroidal RF System is designed to help:

- Redefine the oval shape of the face and lift the wrinkles of the cheeks
- Smoothen the crumpled aspect of the neck
- Improve the orange peel appearance and cellulite
- Reduce skin sagging and slackening
- Tighten the belly slackening that occurs following a change of diet or a pregnancy
- Reshape the fatty tissues around the knees, ankles and strengthen the abs and saddlebags
- Smoothen stretch marks and scars

## IS IT SAFE?

The MPR Toroidal RF System is designed by experts under scientific supervision and is certified by TÜV for safety and essential performance.

## IS IT PAINFUL?

While heat is gradual and controlled, the treatment is painless and cozy.

## WHEN WILL I SEE RESULTS?

Most clients feel their skin repulped and toned after just one treatment. Usually 6 to 12 sessions are required for optimum results. The number of sessions will be decided jointly with your beauty professional.

## WILL THE RESULTS LAST?

With a healthy lifestyle and a balanced diet, the results will last. However a maintenance treatment session is required at a frequency that will be decided jointly with your beauty professional.

## RESULTS

### THAT MEET YOUR HIGHEST EXPECTATIONS

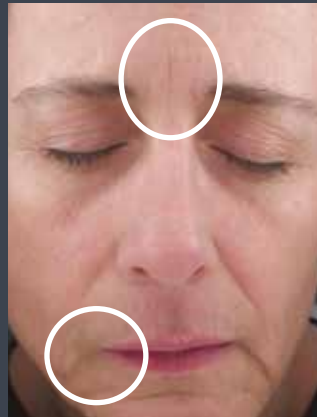

The MPR Toroidal RF System will help you fight aging signs and regain a younger look, smoother skin and slimmer body.

# SKIN AGING CAN BE REVERSED

With time or following a change of diet, men and women may experience skin slackening over either their face or their body.

The MPR Toroidal RF System's radiofrequency waves will enter different levels of the skin while heating them. This thermal energy will accelerate the metabolism and enhance the elasticity of the conjunctive tissue and trigger the creation of new fibers. The new skin's support tissue will be similar to younger people's skin and will boost your epidermis.
